ABOUT ME

Hardworking team player who's passionate about using engineering to improve people's lives and experiences. Excited to combat real-world problems with meaningful solutions.

EDUCATION

B.S. Mechanical Engineering
University of California, Berkeley

Expected May 2028

EXPERIENCE

Division I Student-Athlete, UC Berkeley, Women's Track and Field and Cross Country
(August 2024 - Present)

- Utilize effective time management and organizational skills to balance 20+ hours of practice, training, travel, and competition with 20+ hours of academics each week
- Collaborate with 50+ student-athletes, coaches, trainers, and nutritionists to maximize athletic performance
- Implement strong interpersonal skills to facilitate conversation between coaching staff and teammates and relay information in a timely and effective manner

Intern, Natural Machines, Barcelona, Spain
(June 2026 - July 2026)

- Built and configured a ROS 2 Jazzy workspace on an NVIDIA Jetson for robotic arm development and integration
- Configured and tested CAN bus communication between the Jetson and Damiao motors using SocketCAN and UART, including flashing motor CAN IDs
- Supported hardware integration and troubleshooting, including BOM verification, mechanical assembly preparation, and modification/3D printing of outer shell components
- Gained hands-on experience with ROS 2, NVIDIA Jetson, CAN bus, Linux, Git/GitHub, embedded systems, and robotic motor control

Intern, Stone Creek Environmental Consulting
(June 2025 - August 2025)

- Evaluated new and existing infrastructure for compliance with stormwater runoff regulations
- Collected data in the field, analyzed trends, and drafted deliverables for numerous clients based on the findings
- Advised and collaborated with a team on ways to make our advisees' projects green, sustainable, and compliant
- Maintained numerous logs on different platforms on a monthly, weekly, and daily basis, while staying up to date on the legislation regarding stormwater safety

Assistant Swim Coach, Dana Hills Swim Team
(May 2023 - August 2023)

- Worked on a team of eight to coach 200+ 3- to 13-year-olds and led the team to a third consecutive county title
 - Collected data on swim times and calculated splits and improvements
 - Communicated effectively with parents on a daily basis in an approachable and clear manner
-

PROJECTS

FSAE EV Chassis, *Formula Electric at UC Berkeley*

(January 2026)

- Designed and CADed a fully rule-compliant front half of an FSAE race car's chassis
- Researched materials, dimensions, and possible prototypes to
- Optimized the design by running simulations and making data visualizations on the chassis' points of weakness and using AI to compare solutions

Smart Watch, *HOPE at UC Berkeley*

(January 2026 - June 2026)

- Researched components, designed schematics and layouts, and manufactured a PCB for a smart watch that tracks heart rate and temperature
- Team and I will be presenting our project to a field of professionals at the end of the semester

Habitat for Humanity, *Clayton Valley Charter High School*

(December 2023 - March 2024)

- Reviewed existing floor plans and revised them to maximize efficiency of space within a given budget
 - Conducted research to identify the best places in the community by reading maps and compiling a list of abandoned properties
 - Designed and submitted sample floor plans using Fusion 360 software and a 3D printer
-
